PROFESSIONAL SUMMARY

Highly motivated Data Scientist pursuing a B.Sc. in Artificial Intelligence at Helwan University. Strong foundation in Machine Learning, statistical modeling, and Data Analysis. Proven ability to apply Scikit-learn and Deep Learning frameworks to complex datasets, with a portfolio of practical projects demonstrating expertise in predictive modeling and data visualization. Interested in leveraging AI principles to extract actionable insights and solve real-world business problems.

EDUCATION

Helwan University

B.Sc. in Computer Science and Artificial Intelligence

Helwan, Egypt

September 2023 – Present

RELEVANT EXPERIENCE

Digital Egypt Pioneers Initiative (DEPI)

Nov 2025 – Present

Machine Learning Trainee

- Completed a 20-week intensive Machine Learning internship covering mathematics, Python, data preprocessing, and ML pipelines
- Built 5+ applied ML projects including Titanic classification and California housing regression using real-world datasets
- Applied 10+ supervised and unsupervised algorithms including Linear and Logistic Regression, KNN, SVM, and Decision Trees
- Gained hands-on experience with Deep Learning, NLP, Computer Vision, Azure AI services, and MLflow for experiment tracking

National Telecommunications Institute (NTI)

Jun 2025 – Aug 2025

Machine Learning Trainee

- Completed a 120-hour Machine Learning scholarship with a final score of 93.5%, demonstrating proficiency in core ML principles
- Mastered Supervised Learning algorithms including Linear Regression, Logistic Regression, SVM, KNN, Naive Bayes, Decision Trees, and Random Forest

PROJECTS

End-to-End Heart Disease Prediction System

August 2025

Final Project - Sprints Microsoft Summer Camp | [Live App](#) | [Kaggle](#) | [GitHub](#)

- Developed full-stack ML system for heart disease prediction with a data pipeline using EDA, standardization, and PCA
- Benchmarked 5 supervised models and optimized XGBoost classifier achieving 86.6% accuracy, 89.6% F1-score, and 94.8% recall
- Deployed final model as interactive Streamlit web application for real-time risk assessment with confidence scores

Alzheimer's Disease Classification

August 2025

Final Project - NTI Machine Learning Scholarship | [Kaggle](#) | [GitHub](#)

- Engineered supervised ML pipeline for Alzheimer's classification using 2,149 clinical records and 34 features
- Benchmarked 10 classification models after applying StandardScaler normalization and 80/20 train-test split
- Achieved top performance with XGBoost: 52.6% F1-Score and 94.8% Accuracy for early diagnostic support

E-Commerce Data Analysis & Database System

July 2025

IEEE Student Branch - FCI Helwan | [GitHub](#)

- Designed and implemented a relational database (8 interconnected tables) in SQL Server for 500+ transactional records
- Identified key revenue drivers: Electronics category contributes 45% of total revenue with 30% sales peak in November
- Optimized operations: 68% of orders ship within 48 hours, created low-stock alerts for inventory management

CERTIFICATIONS & COURSES

- Data Analyst in Python Track – DataCamp
- Getting Started with Deep Learning – NVIDIA

TECHNICAL SKILLS

Data Science & ML: Supervised & Unsupervised Learning, Feature Engineering, Statistical Analysis, Model Evaluation (Precision, Recall, F1), Hyperparameter Tuning, Dimensionality Reduction (PCA), XGBoost

Programming & Tools: Python (Pandas, NumPy), Data Cleaning, Handling Missing Data, Outlier Detection, SQL (MySQL, MSSQLServer)

Databases & Version Control: MySQL, Relational Database Design, Query Optimization, Git, GitHub

Data Visualization: Exploratory Data Analysis (EDA), Matplotlib, Seaborn, Plotly, Tableau, Power BI, Interactive Dashboards

Development Environment: Streamlit, Jupyter Notebook, Google Colab, Kaggle, VS Code, PyCharm, Linux CLI, Conda

SOFT SKILLS

Reliable and consistent execution | Clear and direct communicator | High self-discipline and focus under pressure | Strong attention to detail | Organized and structured mindset | Calm, low-ego decision-maker | Adaptable | Task-oriented

LANGUAGES

Arabic: Native | **English:** Conversation
